

Standard Disclosure and Acknowledgement Form

A renewable energy site assessment conducted by an MREA Certified Site Assessor is designed to be a non-biased consultation in order to evaluate a site's readiness for renewable energy. A site assessment is site specific consumer education regarding renewable energy. The site assessment service is not a bid, quote, or a system design. Some MREA Site Assessors may also sell renewable energy equipment and installation services.

In order to help ensure the non-biased nature of the site assessment service, we ask that you please sign this form acknowledging that you understand the following:

- Site assessment reports are intended to be installer neutral
- Your site assessor may provide you a bid or quote for your project at a later date
- Site assessment services are a distinct and separate transaction from a salesperson's bid or quote
